

ring	what it adds	from	method	guarantee
1 joint model	sex, age, marital status, citizenship, education, condition, background, parents' origin, zone	register table (levels) census tables (form)	maximum entropy, exact solver	margins reproduced; declared zeros empty; the individual is a draw, not a record
2 donation	23 attitudinal and health variables; country of citizenship	AVQ public-use microdata (regional pool)	whole-vector hot deck on a demographic signature	the vector is real , reused 25–84×; no geography of its own
3 placement	census section, single year of age, address	census sections (2023); ANNCSU register	exact allocation (largest remainder) within each cell	counts per section real; the assignment carries no information
4 households	household id and role	census sizes PF3–PF8 per section; AVQ repertoire	size as a hard margin, composition from a repertoire	size distribution real per section; the household is a model
D derived	detailed title, sector, names, biography	census 2011 structure; onomastic repertoires	deterministic function of uid and attributes	nothing : plausible by construction, therefore collident (94% share a name)
